1. The amendment filed on November 22, 2005 has been entered. Accordingly:
 - Claims 1-28 and 39 have been canceled;
 - Claims 29, 38, 40 and 48 have been amended; and
 - New claims 49-57 have been added.
2. The terminal disclaimer filed on November 22, 2006 has been entered.

Terminal Disclaimer

3. The Terminal Disclaimer filed on November 22, 2005 disclaiming the terminal portion of any patent granted on the instant application, and of co-pending U. S. Patent No.: 6,626,550 has been reviewed and accepted. The Terminal Disclaimer has been recorded.

Reasons for Allowance

4. Claims 29-38 and 40-57 are allowed.

The prior art of record, including Miwa (US Patent 6,512,557 B1), Lee (US Patent 5,988,827) and Won (US Patent 6,046,785), does not show or suggest the applicant's invention as claimed. Specifically, the prior art of record does not disclose an optical system combining:

- a light guide panel comprising a projection protruded from the side surface; and the projection being thinner than the panel as recited in each of the amended independent claims 29, 38, 40 and 48; and the newly added independent claim 49.

The above-indicated combination, including plate-shaped body of the light guide having a projection protruded from the side surface of light guide, and the projection being thinner than the plate-shaped body of light guide, makes this disclosure unique. Use of a plate-shaped body of the light guide having thinner projection appears to facilitate secure alignment of the light guide in a mold frame during its handling and use. Fine alignment and maintaining the alignment of the light guide is functionally vital requirement.

Miwa ('557 B1), Lee ('827) and Won ('785) each teaches the light guide projection including an upper surface, a lower surface, side end surfaces. Each of Miwa ('557 B1), Lee ('827) and Won ('785) further teaches the light guide projection having thickness same as the plate-shaped body of the light guide. Neither combined nor individual teaching of Miwa ('557 B1), Lee ('827) and Won ('785) teaches the light guide projection being thinner than the plate-shaped panel of the light guide as claimed by the applicant.

Therefore, amended independent 29, 38, 40 and 48; and the newly added independent claim 49 are allowed over prior art.

Claims 30-37 are necessarily objected because of their dependency on the objected base Claim 29.

Claims 41-47 are necessarily objected because of their dependency on the objected base Claim 40.

Claims 50-57 are necessarily objected because of their dependency on the objected base Claim 49.

5. Provision of the Terminal Disclaimer has overcome double patenting rejections of claims 29-38 and 40-48. Therefore, claims 29-38 and 40-48 are allowed.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
